Physics of the Earth and Planetary Interiors, 49 (1987) 361–362
Elsevier Science Publishers B.V., Amsterdam – Printed in The Netherlands

CONTENTS VOLUME 49, 1987

Letter Section

Free-air correction in gravity anomaly interpretation
K. Sundaralingam (Suva, Fiji) 1
An intriguing empirical correlation between the Earth's magnetic field and plate motions
A.K. Goodacre (Ottawa, Ont., Canada) 3

Research Papers

Thermal and mechanical behaviour of the oceanic lithosphere constrained by geoid and gravity anomalies over the Mid-Atlantic Ridge axial valley
B. Lago (Toulouse, France) 6
Earthquake generation in different stress states
R. Teisseyre (Warsaw, Poland) 24
Monte-Carlo simulation of record envelope of a near earthquake
A.A. Gusev and I.R. Abubakirov (Petropavlovsk Kamchatskiy, U.S.S.R.) 30
Evidence for a shear velocity discontinuity in the lower mantle beneath India and the Indian Ocean
C.J. Young and T. Lay (Ann Arbor, MI, U.S.A.) 37
Asperity distribution and earthquake occurrence in the southern Kurile Islands arc
S.Y. Schwartz and L.J. Ruff (Ann Arbor, MI, U.S.A.) 54
Heat flow provinces reconsidered
M. Drury (Ottawa, Ont., Canada) 78
Tidal parameters for an inelastic Earth
V. Dehant (Louvain-La-Neuve, Belgium) 97
Is the oceanic crust over 1 km necessary for the source of marine magnetic anomalies?
T. Furuta, H. Fujimoto and H. Toh (Tokyo, Japan) 117
Geomagnetic secular variation, core motions and implications for the Earth's wobbles
J. Hinderer, H. Legros (Strasbourg, France), C. Gire and J.L. Le Mouël (Paris, France) 121
Further investigations into lunar palaeointensity determinations
S.K. Chowdhary, D.W. Collinson, A. Stephenson and S.K. Runcorn (Newcastle upon Tyne, Gt. Britain) 133
Effects of H_2O on the phase behaviour of the forsterite–enstatite system at high pressures and temperatures and implications for the Earth
L. Liu (Canberra, A.C.T., Australia) 142
Ultrahigh-pressure phase relations in the system $Mg_4Si_4O_{12}$–$Mg_3Al_2Si_3O_{12}$
M. Kanzaki (Tottori-ken, Japan) 168

Comment

Detection of inertial gravity oscillations in the Earth's core with a superconducting gravimeter at Brussels
W. Zürn (Wolfach, F.R.G.), B. Richter (Frankfurt, F.R.G.), P.A. Rydelek (Washington, DC, U.S.A.) and J. Neuberg (Karlsruhe, F.R.G.) 176
